SPECS

Silicone Suction & Discharge Hose

Platinum-cured silicone hose built for liquid and semi-liquid food, cosmetic, pharmaceutical, and chemical applications. Handles high-temperature transfer by suction or pressure. Compliant with FDA 21 CFR 177.2600, German BfR XV, USP Class VI, and EU Reg 1935/2004.

PTFE Convoluted Hose with SS Braid

Helically convoluted PTFE inner tube with 304 stainless steel braid reinforcement. Designed for chemical, CIP/SIP, steam, solvent, and food and beverage transfer. Won't absorb flavor, color, or odor. Autoclavable. FDA 21 CFR 177.1550 and USP Class VI compliant.

Smooth Bore PTFE Lined Hose

Smooth bore PTFE liner with superior flexibility and better chemical and steam resistance than standard silicone hose. SS wire braid reinforcement handles internal pressure and mechanical demands. Clean room manufactured with a smooth, easy-clean white silicone outer cover. USP Class VI and FDA compliant.

"The right fit, the right compliance, the right supplier. We make food grade hose sourcing one less thing on your plate."
